- Data Analytics

ABOUT US

Fusion Technology, a certified HUBZone Small Business, was founded in 2007 to provide comprehensive information technology services and solutions to mission-critical US Government programs, the Intel Community, and security-hardened facilities. With offices in three locations – Bridgeport, WV, Easton, MD, and Huntsville, AL – Fusion Technology is process-oriented and employee-centered where **96% of our employees have TS clearances, 95+% have college degrees**, and our business keeps growing.

Cloud Development

Fusion Technology provides the expertise necessary to improve and enhance an enterprise's migration to the Cloud from on-premise systems or applications into a secure Elastic Cloud or server-less solution. Fusion Technology has provided private- and public-proven cloud solutions for more than five years in the federal technology market.

- Cloud Architecture
- Cloud Migrations
- Cloud Infrastructure
- Cloud Security
- AWS & Azure Certified
- DevOps
- Trade Studies
- Analysis of Alternatives
- Server-less Applications
- Proof of Concept Development

Cybersecurity

Fusion Technology currently partners with the FBI to determine, develop, implement, coordinate, and evaluate information assurance and security standards and programs to comply with FISMA and NIST policies. Fusion Technology helps identify and resolve security violations as well as analyze and develop security features and requirements for systems and system architectures.

Core Cyber Security Services:

- Architectural guidance & program-wide security policies
- Pre-development compliance efforts
- Live incident response and threat detection
- Monitor infrastructure for known & new vulnerabilities
- Compliance audits / ATO
- Dynamic and Static Analysis
- Single Sign-On
- Vulnerability Assessment

Areas Where We Can Help Develop / Maintain Systems:

- Incident Response Efforts
- SIEM content and infrastructure engineering/management
- Management of security applications/devices
- Integration of COTS/GOTS software and hardware into custom environments
- Develop and provide clear and relative reports of applicable metrics and data-points
- Provide user training for security applications as they relate to the current environment

Agile Development

Our Agile practitioners help software development team members produce value using modern, highly responsive practices such as User Centered Design, Behavior-Driven Development, and lightweight prototypes. In addition, Fusion Technology employees are highly adaptable and can operate within organizations at any level of Agile maturity, using Scaled Agile Framework (SAFe), DevOps, Kanban, or Scrum Software Development Lifecycle (SDLC) frameworks.

Supporting All Stages of the SDLC:

- User Story/Requirements Gathering
- Facilitating Minimum Viable Product Outlay
- Incremental Software and Process Improvement
- Developing Cross-Functional Teams
- Ongoing Process Maturation
- Interfacing with Waterfall
- Agile Transformations
- Team Coaching
- Providing SAFe Training
- Increasing Employee and Stakeholder Engagement
- Performance and Value Optimization

Biometrics

Fusion Technology offers biometric system engineering, development, and operations and maintenance (O&M). Our employees have provided key CONUS and OCONUS solutions and support for enterprise level biometric and identity management initiatives throughout the US Federal Government, including DoD, DHS, DoS, and FBI.

- National and International Biometric Standards and Specifications
- Identification Resolution within Multi-Modal Systems
- Altered Print Detection, Machine Learning
- Full Software Life Cycle Support
- Customized Workflows
- Accuracy Studies
- Cloud Migration
- Test Harnesses
