

Agile Development

To improve collaboration, software development timelines, and the overall end-product, Agile project management methods have stepped to the forefront of software development. **Fusion Technology leads the marketplace in its ability to tailor and facilitate customer implementations of these Agile methods.**

Fusion Technology's **security-cleared professionals** bring decades of experience to strengthen and guide our customers' teams, continuously inform leadership, and deliver strong value to stakeholders while simultaneously improving internal organizational processes.

Fusion Technology's Agile practitioners help software development team members produce value using modern, highly responsive practices, such as user-centered design, behavior-driven development, and lightweight prototypes. In addition, Fusion Technology employees are highly adaptable and can operate within organizations at any level of Agile maturity, using **Scaled Agile Framework (SAFe), DevOps, Kanban, or Scrum Software Development Lifecycle (SDLC) frameworks.**

Fusion Technology's Agile practices leverage user story, requirements gathering, facilitating minimum viable product outlay, incremental software and process improvement, cross-functional teams, and process maturation. Fusion Technology has **successfully migrated our customers** from Waterfall to Agile methods, providing team coaching and certified SAFe training.
